

## **A90 - Constructing Greeting Cards**

Instructor: Gayle Higgins

Phone: 282-0727

These are suggestions for materials you will need for constructing greeting cards.

**Please do not go out and buy anything before the first class.** I will have examples and suggestions. You will have a much better idea of what you need after we meet the first class.

- Straight edge – metal ruler 18” would be great or T-square
- Cutting surface - old mat board, self healing cutting board
- Exacto knife with new blades
- Scissors
- Decorative edge scissors
- Acid free glue stick – A good one is Pioneer Embellishment Glue Stick, its extra strong and available at Michael's. Also, places like Archiver's have lots of options. (Some of the “kid” brands aren't that good. White glue, or double sided tapes would work better.)

*\*\*\*Card stock, Envelopes, and Artwork will be discussed in the first class.*
