

A92, A93 - Mosaic Materials

Instructor: Juanita Canzoneri 389-1337
jcanz@hotmail.com (put "mosaic" in the subject line)

Dual-Wheel Tile Cutter

PLEASE NOTE: Instructor will provide all materials needed for a \$15 materials fee, or you may purchase all materials on your own. Materials fees will be collected during the first class session and may be paid by cash or check payable to Juanita Canzoneri.

<u>Need by 1st session (all are included in the materials fee):</u>	<u>Cost Estimate</u>
• Vitreous glass tile—available locally at Full Spectrum, Michaels, Hobby Lobby, and Meiningers, or online at various sources	\$3-8
• Dual Wheel Tile Cutter or Tile Nipper: either tool will do, however the cutter may be easier to use than the nipper when you're starting out. The cutter (see above) is available at Full Spectrum, Royalty Art Glass, or Meiningers. The nipper (also called offset tile nipper) can be purchased at Full Spectrum, Michaels, Hobby Lobby, or hardware stores selling ceramic tile.	\$18-65
• Wooden base approx. 4" square of ¼" hardboard from Home Depot or Lowe's. This will need to be cut down from a larger piece of hardboard.	\$4
• Glues: choose the glue that says it works with your mosaic materials—you'll need to read the labels. Your choices are: Craft Glues: most are available at craft stores Crafter's Pick, Tacky Glue, or any other thick water-soluble glue	\$1-4
• Safety glasses (optional)	Vary
<u>Needed by 2nd session, all of the above plus (all are included in the materials fee):</u>	
• Cement paving stone (approx. 6" x 6") or brick	\$1-5
• Thinset or Liquid Nails-Small Projects	\$5
• Ziplock bags	\$3
• China and/or ceramic tile and/or porcelain tile	Vary
• Hammer (optional)	Optional
• Towel (optional)	Optional
• 2"x2" or larger square of acrylic Plexiglas	Vary
• Silicone Glue, Silicone II, or Liquid Nails Clear, Crafters Pick or WeldBond (WeldBond is not as easy to work with for this project)	\$4-6
• Stained glass scraps	\$4-10 sheet
• Glass cutter (optional)	\$5
• Magnets	\$4
<u>Needed by 3rd session (again, these are covered by the materials fee):</u>	
• Craft sticks (thin tongue depressor) to stir the grout with	\$1
• Disposable plastic cups or containers to mix the grout in	\$1
• Vinyl or rubber gloves	\$1
• Grout—sanded, not premixed. I recommend sanded grout in this class because it is easier to work with than unsanded or premixed grouts. This can be purchased at Hobby Lobby or Ace Hardware in 1 lb. containers or at hardware stores in the tile aisle.	\$5-8
• Grout colorants (optional)	\$5-8
